Requirements Gathering

Set of questions

- Do you have any mechanism to create the timetable easily

- What are the constraints that you consider

- How do you decide the number of periods given to a subject in a week

Answers

- Using a format the timetable is created. The format contains a model which takes into consideration the required constraints.

- The constraints considered are – no. of class rooms, no. of faculties, lunch break, size of class room, duration of class/lab

- The curriculum provided by the institute decides the no. of period of a subject in a week
